

## **Position:**

Web content manager

## **Job description:**

We are looking for a web content manager that will be responsible for the information that appears on our company web site. You will be working closely with developers and quality assurance engineers in order to coordinate the site content and make sure that it caters the needs of the target audience.

## **Reasons to Work with Us:**

1. Work with an excellent team of engineers in a great atmosphere
2. Use bleeding edge software development frameworks and technology
3. Become a part of our process for knowledge sharing and continuous learning and progress

## **What you will be doing**

Responsibilities:

- Taking a lead role in maintenance and development of the site
- Using web content management systems to analyse website usage statistics
- Setting permissions for site users
- Promoting information about the website to target customers and partners
- Carrying out quality assurance checks on content

## **Experience and knowledge of:**

- Knowledge of HTML
- Basic CSS
- Advanced knowledge in English
- Solid understanding of information architecture and best web writing practices
- Strong understanding of web usability and the ability to balance client and user needs to make content and concepts clear to audiences

How to apply:

If you are a highly motivated person, and would like to join our young and ambitious team and contribute your skills and expertise, please send us an email with your CV at [info@iborn.net](mailto:info@iborn.net).
