ENTRY LEVEL
SOFTWARE DEVELOPER

INSCALE
BUILD YOUR OWN TEAM

Want to catch an amazing job?

Are you driven by and looking for a career that will not only empower your personal and professional growth, but will allow you to build the career and future you desire?

Does "Sport Betting", "Virtual Betting" and "Fantasy Football" ring a bell?

If so, keep reading.

INSCALE GLOBAL is a Danish based offshore and nearshore development company with locations in Macedonia, Malaysia, and Portugal. We establish permanent development teams of highly skilled developers for international companies with on-going development of software applications. INSCALE offers IT talents the opportunity to work on exciting products and projects with cutting edge technologies in an agile environment. We maintain an informal Scandinavian management style and organizational culture that provide employees with autonomy and responsibility, allowing them to develop their skills and emphasize their value as an IT professional.

INSCALE is setting up a high-performing agile development team for Gamblify based in Skopje, Macedonia.

Gamblify (www.gamblify.com) is a company that produces hardware and software solutions for the gambling industry with its headquarters in Denmark. Their goal is to revolutionize the industry by creating innovative products. Gamblify's current product portfolio consists of a slot-machine platform, a betting terminal solution and an online casino.

We are looking for enthusiastic and sharp entry level Software Developers that are willing to join Gamblify's existing betting software development team. Joining Gamblify's betting software development team gives the opportunity to learn and work with the following technologies:

Qt Quick	*CMake*	*Protocol Buffers*
QML	*Java*	*Linux*
Qt Creator	*Maven*	*Buildroot*
C++	*Amazon Web Services (AWS)*	*SQLite*
	PostgreSQL	

Candidates with great passion for software development, with or without professional experience, that hold at least a Bachelor Degree in the IT domain (or being at finishing stage of graduation) are encouraged to apply. In addition, experience with software development projects (during or outside degree courses) and experience with internships/studentships would be considered as an advantage.

Send your CV to and@inscale.net filling the subject with: **Software Developer for Gamblify.**

Only shortlisted candidates will be contacted.
