PHP(Laravel) Interns

Looking for Outliers

Tomato Talent is looking for PHP interns in our Skopje office. As intern you will work on our core recruitment platform and gain insight of how engineering team operate.

A typical day might include the following:

- Learning about each function of a recruitment organization and how they work together
- Writing SQL queries
- Building and interacting with RESTful APIs
- Participate in the development of new business practice

You're Good At

- Solving problems - you love taking on difficult challenges and finding solutions
- Helping others - you enjoy helping others and want to
- Working in a team environment
- Understanding of MVC design patterns
- Knowledge of object-oriented programming
- the English language - you will work with colleagues in the London and Amsterdam offices

Extra Awesome

- Database experience (SQL)
- Coding experience (PHP/Laravel)
- Basic understanding of Front-end technologies
- Proficient understanding of code versioning tools such as Git
